

The „Solarwave-Project“

**„ Circumnavigation of the World
without Fossile Fuel “**

or:

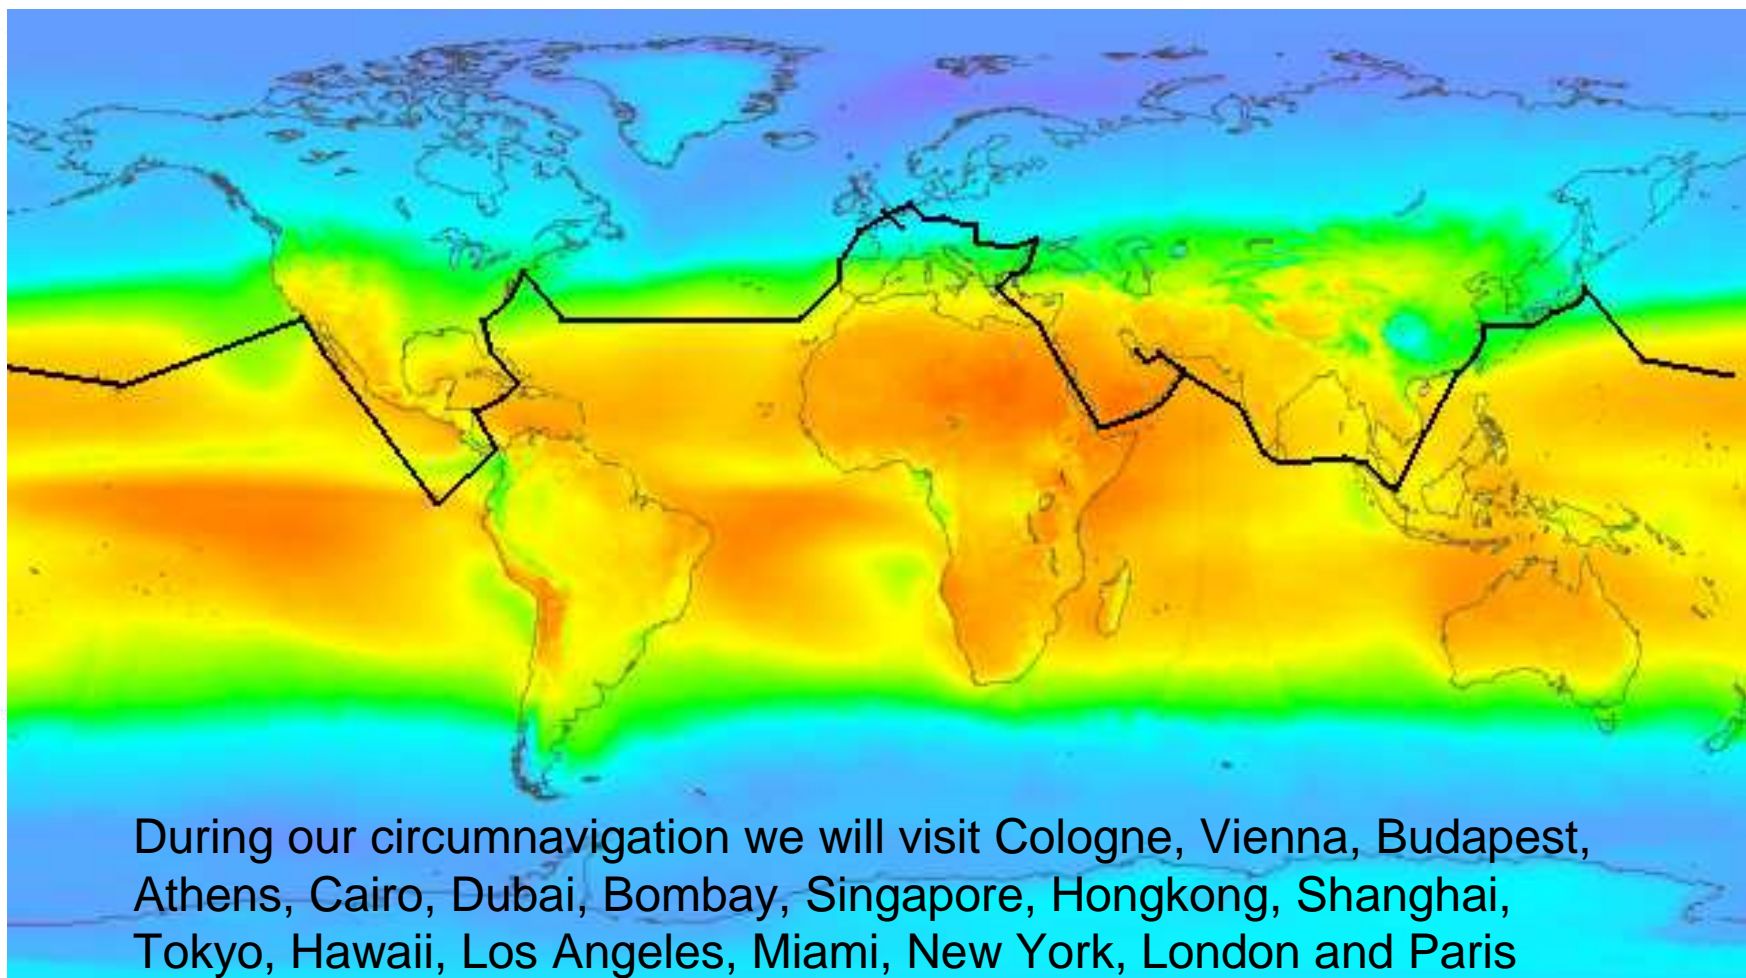

**„Environmental Protection and New Technologies
as a new marketing-chance“**

and how you can participate and benefit from it

About the project

- The Solarwave-Project is building a Catamaran, which will be powered exclusively by solar panels and wind generators.
- In October 2009 we will start to circumnavigate the world. Never before in the history of mankind a ship without sails and without fossil fuel has covered such a long distance. We accept this challenge! About 20 month after the start, the two-man crew will be back in Europe.
- On www.solarwave.at you can find details about the project and also references of companies and people who support us already.

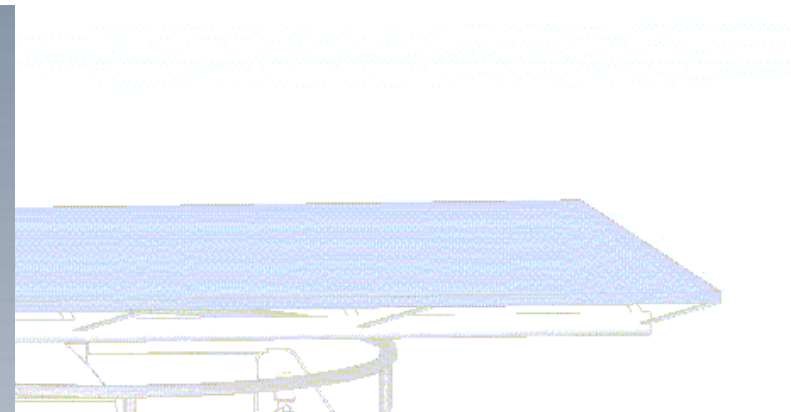

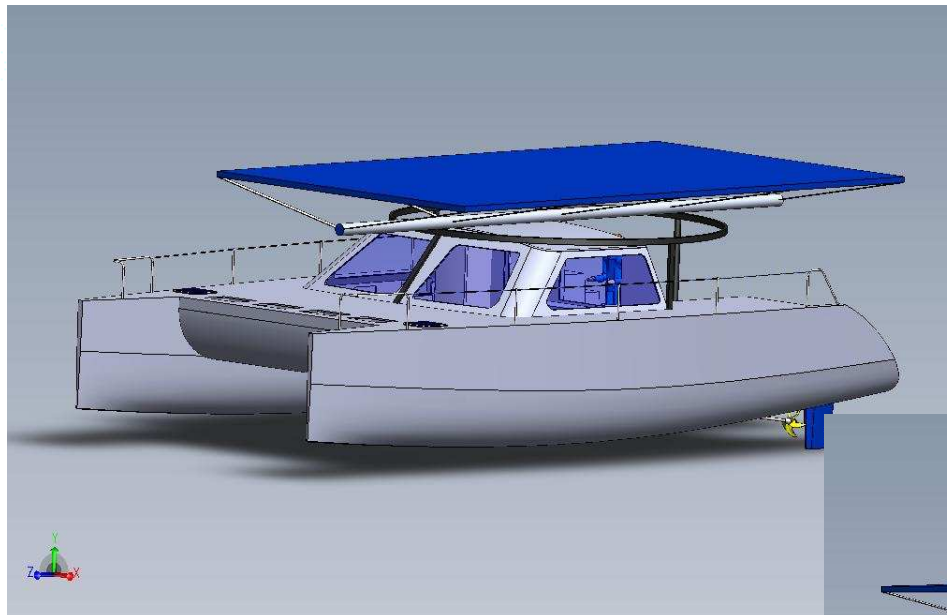

The route around the world

No fossile fuel- how can it work?

- Since 4 years we are testing on a specially equipped boat - so we found out that it can be done - and we found out, how it can be done!
- During the voyage the produced energy will be stored in batteries. It will be used for propulsion with electric motors and to supply all home appliances and navigational instruments. We will proof, that it is possible to drive for weeks without stopping - and, additionally - to live self-sufficiently for several month - including electric stove, microwave, washing-machine, hoover, freezer and fridges, television, computers and air condition.
- Even the drinking-water will be produced out of sea-water. The boat uses neither sails nor combustion-engines. No fossil fuels, not even for cooking - we will circumnavigate the world with zero emission! Can you imagine, that this will attract the attention of media all over the world?
- With our Satellite phone we are permanently connected to the world - even in the middle of the pacific-ocean we are able to transmit photos and articles to newspapers and TV-stations, to inform interested people what is happening on the boat.

The future is under construction already – the „Solarwave – Catamaran“

Constructed by:

www.bluekat.de

Length: 13,70m

Width: 7,50m

Why should you participate in the solarwave-project?

- For this project only the best components are good enough - Energy-efficiency and reliability are most important. Only the best producers can be part of our team.
- This is a superb opportunity to demonstrate the advantage of your products to the world.
- You could be part of this historically unique project!
- Your return on invest is by far higher than your investment - in many aspects!

Here is our offer:

- **Become a sponsor and you will receive:**

- extensive advertisement - over a period of 2 years in hundreds of newspapers, magazines and TV-stations all over the world!
- according to the sponsored amount you will get advertising-space on the hull.
- The boat with the ads on it will be seen in hundreds of newspapers and magazines, in TV-shows and documentary films during the journey of about 20 month and afterwards when the boat returns to Europe. Before and after the circumnavigation it can be exhibited on the big boat-fairs.
- and also according to the sponsored amount we offer you free of charge "All Inclusive Charter-Weeks" - during the circumnavigation!
You can use these weeks e.g. as incentives or to invite business-partners.

Not sure yet?

– here are some more arguments:

- you can advertise with the fact, that you are the chosen supplier for Solarwave, that we rely on your products. We will support you with stories of the journey and photos of the boat with your logo on it - professional material, that you can use for your advertisement.
- in collaboration with our embassies and the commercial settlements of our supporting partners we will organize press-conferences and events in cities like New York, Miami, Los Angeles, Tokyo, Shanghai, Hongkong, Singapore, Bombay, Dubai, Cairo, London, Paris and Vienna. A very good advertisement for your company.
- since years we, Michael Köhler and Heike Patzelt, work as journalists for several renowned boating-magazines and make multivision-shows about our projects (on www.die2abenteurer.com - you will find extensive material). Very often we are asked, which products we use and why - so we tell the people which brand and why - that word of mouth is the best advertisement - cause the people know, that we have tested all brands.

Who are the people behind the project?

Mag. Michael Köhler

His passion for the seafaring began when he was 18 years old with a small boat, several cabin cruisers followed.

After his degree in law he began his apprenticeship at a classic square-rigged-schooner under a Captain of the German navy he had to learn everything about seamanship from Scratch. In the last years he sailed more than 60.000 miles in his own boats.

Heike Patzelt

Since several years she is an enthusiastic yachswoman. In her “former life” she managed a hairdresser’s shop.

She loves the life aboard, the proximity to nature and the possibility to learn about foreign cultures as well as to entertain the guests.

She is an excellent cook and her sunny nature makes every day become an experience.

I am looking forward to a future cooperation!
